Java Full-Stack Developer with 4+ years of experience in web development, Agile methodology, and team collaboration. Proficient in Java, Spring Boot, Hibernate, and microservices architecture. Skilled in designing and developing RESTful APIs and ensuring scalability and security. Experienced in Agile and Scrum methodologies, with exposure to cloud technologies like AWS. Familiar with tools such as Kafka, Jenkins, Grafana, MongoDB, and MySQL. Worked on enhancing and supporting frontend applications using React, ensuring improved user experience and performance. Passionate about building efficient, scalable, and innovative software solutions.

Skills

Languages & Frameworks	Java, Sql, NoSql, Spring Boot, Spring JPA, Spring Security, Spring Cloud, React, RESTful APIs, Mockito
Architectures	Monolithic, Microservices
Databases	MySql, MongoDb
Tools and Technologies	Kafka, Swagger, SonarQube, Log4j, JUnit, Post Man
DevOps and Infra	AWS, Jenkins CI/CD, Docker, Kubernetes , Git, Rancher, Nginx, Grafana
Build Tools & Utilities	Maven, IntelliJ IDEA, Eclipse, Github, Gitlab, Cloud Defense
Core CS Concepts	DSA, OOPs, DBMS

Technical Experience

Nagarro - SDE **Gurugram, Haryana**

Digital Consumer & SMB Banking Solution *April 2025 — Present*

- Working on a U.S.-based banking project that offers financial products like **credit cards, term loans, unsecured loans, and deposit accounts for small businesses and consumers.**
- Enhanced third-party integrations including **MasterCard (webhooks, V2 upgrades, credential updates)** and internal financial data systems to support **income verification and real-time credit decisioning, reducing verification turnaround time by 35%.**
- Implemented **configurable multi-bureau support (TransUnion, Experian, Equifax)** and standardized key-mapping, **reducing data discrepancies by 15% and improving credit processing efficiency by 10%.**

Hiring Automation *June 2024 – Mar 2025*

- **Designed and implemented a microservices-based hiring automation system** using Java, Spring Boot, and MongoDB, ensuring **improved scalability and maintainability.** Developed modular service components to streamline various recruitment processes.
- **Integrated multiple external APIs,** including CV Parsing for automated resume extraction, SHL test triggers for seamless assessment scheduling, and Cibil API for credit score verification, **enhancing recruitment efficiency by 70%.**
- **Implemented real-time data streaming and event-driven communication** with Apache Kafka, enabling asynchronous processing of candidate status updates, test results, and application tracking, **reducing processing delays by 50% and improving system responsiveness.**

Payments Payables Platform *Jul 2022 — May 2024*

- **Developed and optimized CRUD APIs in Java Spring Boot Lambda,** leveraging **Amazon DynamoDB** for seamless storage and retrieval of routing information objects, **reducing processing time by 20% and enhancing system scalability.**
- **Containerized Spring Boot microservices with Docker**, crafting lightweight production images via **multi-stage builds**, **externalizing configs**, and **passing secrets securely** to ensure reproducible deployments across environments.
- **Contributed to the React frontend by fixing bugs and enhancing the UI**, resulting in improved user experience and better alignment with backend functionality.

Projects

Bank Account Management **Personal**

- Developed a Spring Boot microservices-based banking system for customer and account management. Integrated Eureka Server for service discovery, API Gateway for seamless communication, and Configuration Server for centralized management. MySQL used for secure and scalable data storage, ensuring compliance with financial regulations.

Result Management System **Personal**

- Built a result management system using Node.js, HTML, CSS, and JavaScript, following the MVC architecture. Implemented authentication for teachers and students, allowing teachers to perform CRUD operations on student results. Designed an intuitive interface for efficient result management and secure student access.

Education

Bachelor of technology (Computer Science Engineering). *Bharati Vidyapeeth's College Of Engineering, New Delhi, India* 2018-2022
